35 | Symbols are defined following the standard for global names:
36 |
37 | RPG\$_abcmnoxyz
38 |
39 | In addition, the library standards specify that the letters "abc", "mno",
40 | and "xyz" are the first three letters of the first three words of the error
41 | message, not counting articles and prepositions.
42 |
43 |
44 | MACRO-32 Programming:
45 |
46 | The macro call:
47 |
48 | \$RPGDEF
49 |
50 | will cause all symbols to be made available to the module.
51 | The Run-time Library declares these symbols as EXTERNAL;
52 | the macros are provided only for the convenience of the user.
